

PRONTO 19

Pronto 19 is our first step into creating a new dual-purpose pool/dining or pool/work table with modular legs.

The main construction of the table is used from Pronto Vision table:

- construction is durable and strong because of their combined wood and metal interior structure,
- this model meets all your dining and work needs as well as your leisure needs: place the glass or wood table top on top of your table and dine or work on,
- this exceptional pool table has an excellent ball rebound because rails 'Professional Billiard Slate' and frame are all integrated into each other,
- choose between traditional elastic ball pockets or a unique collection system, built into the table's interior, and most importantly - enjoy!

Some important adjustments:
rounded corners with purpose to fit perfectly leg design; in order to complete the seamless design, we specially for this model also started producing dining top with rounded corners as well.
